Sub:- Regarding Glanders Surveillance in equid population.

Sir,

Serum samples of three suspected Horses from Azadpur Sabzi Mandi in Central District, Delhi were sent to the National Research Centre for Equines (NRCE) on 22-04-2024 for testing against Glanders disease. As per the report received from NRCE (Letter No. F.No.9-66/Misc/P-IV/2024-25/247 dated 08/05/2024) the incidence of Glanders in the horses is confirmed.

In this connection, as per the National Action Plan for Control and Eradication of Glanders in India, 2019 geographically or administratively demarcated area which includes 5-25 km around the nucleus/ focus of infection, 25% equids population has to be screened twice within three months. So, if your institution has equid population in below mentioned district of Delhi, 25 % equid population has to be screened twice within three months.

Districts: a. North West, b. West, c. North East, d. North, e. New Delhi

In this regard, you are requested to inform the concerned Officers in your Institution / organization for collection of samples from the 25 % equid population in their Jurisdiction and send it to their **Designated laboratories or NRCE, Hisar** for Glanders test by **30-06-2024** (first round).

You are also requested to submit details of the samples sent to **designated laboratories or NRCE, Hisar** and the results to the undersigned.

The below mentioned documents are enclosed for ready reference in this regard:

1. Letter from NRCE Hisar dated 08.05.2024.
2. National Action Plan for Control and Eradication of Glanders in India, 2019.
3. Copies of do and don'ts in case of incident of Glanders with request to circulate the same to the equine owners immediately and guide them accordingly.

Necessary guidelines of GOI for COVID-19 & Glanders as applicable should be followed while handling the animals and collecting / processing biological samples.
